# OG 615

Plate Cleaner Desensitizer

---

---

## ***Product Description***

OG 615 Plate Cleaner Desensitizer is a multipurpose cleaner for use on most brands of thermal and violet processed metal plates. It is designed to remove ink, gum glaze and paper. It is also a good desensitizer for sensitive plate areas and scratches. OG 615 is also suitable for use as a cleaner/desensitizer on chrome rollers and metal cylinders.

## ***Product Application***

OG 615 Plate Cleaner Desensitizer can be used as a general purpose cleaner on both sheetfed and web presses. Modern CTP plates may become sensitive due to wear from friction, build-up of contaminants, and damage in handling. OG 615 will clean and desensitize plates from all of these sources.

## ***Technical Specifications***

Flash Point (°F TCC)	>200
VOC (lb./gal method 24)	0.82
Specific Gravity	1.01
Water-Miscible	Yes
Appearance	Milky White
Odor/Fragrance	Mild Solvent

## ***Features and Benefits***

- \*Compatible with most thermal and violet CTP plates.
- \*Fast-cleaning emulsion.
- \*Excellent cleaner and desensitizer.
- \*Multi-purpose for plates, chrome rollers and impression cylinders.

## ***Directions***

- Sheetfed Press:** Use when press is stopped. Saturate a water-dampened cloth or sponge with OG 615 Plate Cleaner Desensitizer. Apply to surfaces to be cleaned; then wipe off with a clean, dampened cloth.
- Web Press:** Follow the same procedure as with sheetfed. For emergency clean-up, OG 615 may be applied directly to the plate with a spray bottle while the press is running. Use two to three percent solution for best results.
