# OG 133 FOGRA Approval Select Wash

*FOGRA Approved Blanket and Roller Wash*

---

---

## ***Product Description***

OG 133 FOGRA Approval Select Wash is based on the wash formulas most recommended by European press manufacturers. It has a flash point of 142°F, a very mild odor and contains an anti-corrosive agent with no aromatic hydrocarbons. It is water-miscible with Nova's special ink-cutting rinseable formula. OG 133 FOGRA Approval Select Wash has FOGRA approval on manroland, KBA, and Heidelberg sheetfed presses and Baldwin sheetfed ABCs.

## ***Product Application***

OG 133 FOGRA Approval Select Wash is primarily recommended when FOGRA approvals are required on new press installations and automatic blanket wash systems or when a mild high flash point wash is required. The 142°F flash point means that the used solvent can be transported as a non-hazardous waste. The non-aromatic hydrocarbon formula means no TRI reportable compounds and a high degree of user-friendliness.

## ***Technical Specifications***

Drying Speed	Slow
Water-Miscible	Yes
Flash Point (°F TCC)	145
VOC (lb/gal method 24)	6.26
Vapor Pressure (mm HG)	0.5
Odor/Fragrance	Mild / Vanilla

## ***Features and Benefits***

- \* FOGRA approved on manroland, KBA, Heidelberg sheetfed presses and Baldwin sheetfed ABCs.
- \* Low volatility decreases exposure to vapors and reduces usage.
- \* Contains anti-corrosion additives.
- \* No blanket or roller hardening or swelling.
- \* Very low odor and will not irritate skin or eyes.
- \* Water-miscible – special ink-cutting rinseable formula.

## ***Directions***

Blankets: Apply OG 133 FOGRA Approval Select Wash to a water-dampened cloth, wipe blanket until ink is removed. For best results, follow with a water-dampened cloth to remove all residual contaminants. Alternately, add 20% to 50% water to OG 133 FOGRA Approval Select Wash in a wash-up bottle. Shake well before using.
