

Extreme Series

Premium quality, high gloss ink series developed to run on medium size to large press formats. Extreme is very press stable, slow to "skin" in the can and fountain but has quick set and dry capabilities. Extreme performs day in and day out under the most demanding of high quality production departments.

Color Management

At Oldham the ink formulary process begins with emphasis on color management. We have merged formulation expertise with prepress color management technology to create our **PRINTSOLUTIONSGROUP** (PSG). Our Ink Division and PSG services team bridge the gaps between plate curves, proofing and pressroom, we close the color control loop between press and prepress. Oldham provides a color-managed ink solution that is crucial to efficient and profitable production. Our Gap Analysis optimization process ensures accurate press to proof color alignment. Ask about the core color services offered by our **PRINTSOLUTIONSGROUP**.

Quick Set and Dry

Work and turn quickly allowing for greater efficiencies in production scheduling.

Press Stability

Extreme is stable on press; it holds color through speed changes and remains in balance.

Excellent Flow

Extreme has open flow technology allowing good flow in fountain, transfer through ink train with quick leveling on sheet.

Good Gloss

Exhibits excellent gloss characteristics with a tough durable finish

Coatable

UV and aqueous coatable, laser safe and works well with lamination. Post press operations should always be tested prior to production run.

Extended Stay Open

Stay open in the can and fountain for about 72 hours, we recommend cleaning the ink train when the press is down for extended periods. Actual stay-open period will be dependent on environment.

Availability

Extreme is available in 4C process and Dense Black.

Technical Considerations:

The information and recommendations in this publication are, to the best of our knowledge, reliable. Suggestions made concerning uses or applications are only the opinion of The Oldham Group (TOG), and users should make their own tests to determine the suitability of this product for their own particular purposes. However, because of numerous factors affecting results, TOG makes no warranty of any kind, expressed or implied, including those of merchantability and fitness for particular purpose, other than that the material conforms to its applicable current Standard Specifications. Standard Specifications, although current at the time of publication, are subject to change without notice. Please refer to the MSDS for additional information. DATE REVISED: 09/02/2008
