
OG 115 30% Silicone

Silicone Anti-Marking Solution for Web Printing

Product Description

OG 115 30% Silicone is a pure non-ionic silicone anti-marking solution for web printing. It contains approximately 30% active silicone solids for excellent performance and economy for variable conditions. The viscosity is controlled to give optimum stability and ease of handling in all temperatures. It is compatible with antistatic additives which can be used as needed in high static conditions.

Product Application

The key to silicone selection is to match the right product for the conditions encountered in the pressroom to provide the best overall performance at the lowest cost. OG 115 30% Silicone is a medium solids product designed for high speed and high anti-marking demand with excellent cross platform compatibility. The OG 115 30% Silicone will provide excellent slip and anti-marking characteristics for all heatset and coldest web platform applications.

Technical Specifications

Flash Point (°F TCC)	> 200
Specific Gravity	1.0
Viscosity	100-500 cps
Water-Miscibility	Complete
% Non-Volatile	30.0
Weight/Gallon	8.3

Features and Benefits

- * 30% silicone solids for excellent performance and dilution economy.
- * Compatible with antistatic additives.
- * Excellent cross platform performance.
- * Recommended for magazine/catalog, commercial, insert, and book printing.

Directions

OG 115 30% Silicone should be diluted at 6-15% depending on printing conditions. Higher dilutions may be required for heavy stock and higher ink coverage. Adjust silicone applicator to lowest setting that will provide good signature delivery with no visible former board marking. For high static conditions add an antistat to the diluted silicone as instructed.
